### ➤ Allied to distribute Sika products

[Allied Building Products](#), one of the country's largest distributors of residential and commercial roofing, siding, waterproofing, windows and interior/exterior building materials, announced today that it has agreed to begin distributing Sika Corporation's diverse line of sealants, epoxies, concrete repair mortars, waterproofing materials and coating products. Sika's products will be sold directly to multiple professional contracting trades throughout the tri-state area via Allied Building Products vast network of 42 branch locations.

"The partnership between Allied and Sika is a natural fit," said Bill Zens, National Product Manager of Allied Building Products' Construction Products Division. "It gives Sika the opportunity to expand its sales reach to our loyal customer base, while giving Allied the opportunity to add another reliable brand to our diverse product offering."
